Sub:- Information regarding sighting of green tagged Bar-headed Goose (*Anser indicus*) during AWC 2015 at Konar Dam and Hatia Dam .

Dear Sir,

We are pleased to inform you that, we have received the report of green tagged Bar-headed Goose sighted at Konar Dam (Hazaribag) on 4th February 2015 and Hatia Dam (Ranchi) on 26th January 2015. The tag was green coloured and coded as F 40 and K... (not clear). The code of other bird from Hatia Dam was not clear. The code and photograph was sent to BNHS, Mumbai for further information.

We received the information from Tsevenmyadag N., Head, Laboratory of Ornithology Institute of Biology, MAS, Wildlife Science and Conservation Center, Mongolia that, **the green color band F40 bird was captured and marked on 15 July 2013 at the Northwest bay of the Terkhiin tsagaan lake in province Arkhangai of the Central Mongolia. Capture location is N 48.161426, E 99.596579. (Email enclosed)**

The other Bird (Hatia Dam, Ranchi) location was not ascertained since the **code (K ...)** was not clear, but it was also confirmed that it was tagged in Mongolia. **(Email enclosed)**

The information proves that Bar-headed Geese are migrating from Mongolia to Jharkhand.

Thanking you.

Yours Sincerely

[Satya Prakash]

Dear Satya,

I believe that both of the birds that you are referring to were marked in Mongolia by the Wildlife Science and Conservation Center. I am cc'ing N. Tseveenmyadag and B. Nyambayar who should be able to provide you with more information on the history of these birds.

Best wishes,
martin

Dear Sir

We will be very thankful to you if we received information regarding these ringed birds. Tomorrow we have to submit the report to the Forest and Environment Department, Govt. of Jharkhand regarding the survey of Birds.. It will be good if we add the information of these birds. Please request you to let us know information of these birds.
